Contact	:	-
Full-time/part-time	:	FT
Starting date	:	Jan 2019
Type of contract	:	Permanent

Flen Health: Where Vision meets Reality.

Flen Health is an international, innovative wound care group with companies based in Luxembourg, Belgium, Netherlands, Germany and UK.

In a few years' time, it gained a leading position in the Belgian wound care market, its Home market and is working towards reaching this on an international level. This result is due to a twofold reason: (1) dedicated people (2) products combining innovation with significant progress in wound care, inspired by our motto: We help you live the life you love.

We are looking for a full time, dedicated Lab assistant for start as from January 2019 at our headquarter in Esch-sur-Alzette (Luxembourg).

As a R&D assistant, you are specialized in cell culture and will assist R&D team-members in day-to-day lab activities within a team and thereby contribute to the development of new products and new research lines.

Only applications in English will be considered.

Tasks and responsibilities:

- Assist in the development of advanced in vitro cell culture models to evaluate products for the topical treatment of wounds and other skin disorders.
- Perform cell tests (prokaryotes and eukaryotes) and maintain cell culture models
- Perform physicochemical tests on products, and raw materials.
- Comply with quality and lab-documentation SOP
- Assist in building and performing analytical tests for registration of products.
- Assist in coordinating and monitoring analytical, chemical, physical or biological tests that are outsourced to third parties.
- Share other general duties and responsibilities required to ensure smooth running of a cell culture lab (i.e. ordering reagents) with rest of the team.

Requirements:

Essential:

- Scientific Bachelor or Master degree or equivalent through experience
- Knowledge of cell-culture
- Knowledge of microbiology
- Be fluent in English
- Have an entrepreneurial attitude
- Team player
- Be analytical, accurate, well organized and autonomous
- Be result and process oriented

Desirable:

- Experience in applying co-culture techniques and assistance in cell-model development would be advantageous
- Experience in galenics of semisolids and polymer based semisolids (gels, creams,...) would be advantageous
- Work experience as assistant (or similar position) in a cell culture lab is an advantage
- Be fluent in French, Dutch and/or German is an advantage
- Have the ability to innovate and propose new projects and willingness to learn is an advantage

Work at Flen Health :

Flen Health is a young and growing, independent organization with short communication lines, and where entrepreneurship is appreciated. Its products are innovative, patented and are well regarded by the key opinion leaders internationally.

Several highly motivated and enthusiastic colleagues have already joined Flen Health and contribute to its success. As an expanding company, we offer possibilities for personal development and growth.

We look forward to receive your application at the following email address:
